Developments in spectrum availability for programme making and special events (PMSE)

Digital Switchover (DSO)

The move from analogue to digital terrestrial television in the UK (DSO) is proceeding on a region by region basis and will be completed in late 2012. The UK is also committed to clearing the 800 MHz band (790 – 862 MHz) to facilitate the introduction of new mobile broadband technologies. One of the impacts of DSO and Clearance is that some of the spectrum cleared of analogue broadcasting will be released for new uses. This is known as the Digital Dividend Review ¹.

A consequence of these developments is that the configuration of spectrum currently available for PMSE use in UHF Bands IV and V (470 – 862 MHz) is going to change. This is primarily because the new cleared spectrum (550 – 606 MHz and 790 – 862 MHz) will no longer be available for use by PMSE after DSO and Clearance has taken place.

Channels 69 and 38

In June 2009 Ofcom confirmed that channel 69 (854 – 862 MHz) will be cleared of PMSE use ² in response to developments at a European level towards harmonising the 790 – 862 MHz band (the 800 MHz band) for new mobile broadband technologies. However, to help limit disruption to PMSE use, channel 38 has been set aside as a replacement to channel 69. Whilst channel 69 has been available across the whole of the UK, channel 38 will only become fully available nationwide for indoor use after 21 September 2011, and for outdoor use only after DSO is complete. Until then, the wireless microphone shared licence includes access to channel 69 UK wide and channel 38 according to geographical availability.

Terms of access for channel 38 differ from channel 69 in that the licence does not state specific frequencies; instead frequency ranges are given. Coordinated frequencies are not available in channel 38.

To help with the sector's transition, for locations where channel 38 is not yet fully available, temporary access to additional frequency ranges in channels 39 and 40 is also being given. Availability of the permissible frequency ranges must be confirmed for each location prior to use through JFMG (details on their website: <http://www.jfm.com.co.uk/JfmEcom/Wireless/Public/MicrophoneSh600.aspx>)

Interleaved spectrum

While the outcome of international negotiations is not complete, and therefore a risk of change to the DSO and Clearance Plan remains, it is considered that it is sufficiently stable in order to indicate future spectrum availability for PMSE. Ofcom has published a Statement on "Future access to interleaved spectrum for programme making and special events" ³ which provides further details.

JFMG have produced a look up tool ⁴ which provides future geographical spectrum availability information for wireless microphones and monitors after DSO and Clearance is complete.

¹ <http://stakeholders.ofcom.org.uk/spectrum/project-pages/ddr/>

² <http://www.ofcom.org.uk/consult/condocs/800mhz/statement/clearing.pdf>

³ <http://stakeholders.ofcom.org.uk/binaries/consultations/bandmanager09/statement/pmse-future-access.pdf>

⁴ <http://www.jfm.com.co.uk/jfmecom/wireless/public/microphonedso.aspx>

Temporary access to cleared spectrum

From 1st July 2012 to the 1st October 2012 access to TV Channels 61 – 69 will only be available in London, North East England and Northern Ireland⁵. From the 1st October 2012 access to Channels 61 – 69 will cease completely. However, the availability of these channels will be reviewed in the Autumn of 2011 and access may be extended to 31st December 2012 at the latest.

Until such time as the dates above are confirmed annual licences within Channels 61 – 69 will continue to be issued. If an annual licence is issued with an expiry date after 1st July 2012 (or 1st October 2012 in London, North East England and Northern Ireland) and access to Channels 61 – 69 ends on 1st July 2012 (or 1st October 2012 in London, North East England and Northern Ireland) then the licence will be revoked in accordance with Ofcom's Wireless Telegraphy General Licence Conditions.

If access to Channels 61 – 69 is extended to 31st December 2012 then all annual licences will expire on their due date, but no later than 31st December 2012. Therefore, any licence issued after 1st January 2012 will be for the remainder of 2012 and will expire on 31st December 2012.

Licence fees for annual assignments are based on a fee cap of 4x48 hour periods so there are no financial penalties on the licensee nor will there be any refund payments as a result of a licence revocation as described above.

Analogue wireless microphones use in the 1785 – 1800 MHz band

Ofcom recently made changes to the technical licence conditions for the use of 1785 – 1800 MHz. This spectrum will now allow the deployment of both analogue and digital wireless microphones⁶. This change will be reflected in the next revised UK Frequency Allocation Table issued by Ofcom.

Spectrum Access to 2010 – 2025 MHz

In its Statement, "Release of 2010 – 2025 MHz"⁷ published in February 2011, Ofcom considers that the band 2010 – 2025 MHz will be released through a competitive award and will not be reserved for PMSE use.

Temporary use of the band for PMSE is allowed on a rolling three-month notice period pending an award, with fees for access set on the same basis, and with technical licence conditions aligned with other spectrum used by PMSE at 2 – 3 GHz.

Ofcom will consult further on the detailed award process as soon as practicable and states that the earliest feasible date for the award of the band will be the first quarter of 2012.

In the meantime, licences to access 2010 – 2025 MHz for PMSE use can be obtained from JFMG.

Wireless camera use in the 7 GHz band

The 7 GHz band (7110 – 7250 MHz and 7300 – 7450 MHz) is already allocated for PMSE and annual UK-wide licences are available in a number of frequencies. Ofcom will keep this arrangement under review and reserves the right to stop issuing annual licences in the band where there is evidence of increased demand to use this spectrum.

You may also wish to note that the band 5850 – 5925 MHz is also available for wireless cameras, with geographical restrictions in the Hebrides and West Wales.

⁵ London, North East England and Northern Ireland refer to the TV regions, London, Tyne Tees and UTV respectively

⁶ <http://stakeholders.ofcom.org.uk/binaries/consultations/bandmanager09/statement/statement310810.pdf>

⁷ http://stakeholders.ofcom.org.uk/binaries/consultations/release_2010_2025/statement/statement.pdf

Temporary access to the 2500 -2690MHz band (the 2.6GHz band)

JFMG has been authorised by Ofcom to grant short-term licences for PMSE use of the band until the 2.6 GHz award takes place. Access to this spectrum is granted on three months' notice to ensure PMSE licensees stop using the band by the time of the award.

In its Statement, "Reserving the band 2500 – 2690 MHz for the London 2012 Games"⁸ published in December 2010, Ofcom states that it will reserve the band for wireless cameras between 28 June and 23 September 2012 in order to help satisfy the significant spectrum demand for the London 2012 Games.

Changes to PMSE uses in the 3.5GHz band

In early December 2008, the Ministry of Defence (MoD) informed PMSE users that there was significant uncertainty surrounding their continued access to the 3.5GHz band (two blocks at 3400-3440MHz and 3500 -3580MHz). This followed a MoD Statement⁹ on its programme of spectrum liberalisation which had identified the 3.5 GHz band as a possible candidate for release to commercial users.

The MoD has agreed that PMSE licensees can continue to access this spectrum under the same terms and conditions as at present after Recognised Spectrum Access (RSA) has been issued by Ofcom. This arrangement is, however, unlikely to continue when MoD decides to trade the RSA spectrum. Regardless of the outcome, the MoD has agreed that the PMSE blocks above should be available for PMSE use for the Olympic Games in 2012.

Olympic Venues and Zones

The UK Government has guaranteed to the International Olympic Committee the allocation of the frequencies required for the organisation of the London Olympic Games and Paralympic Games 2012 ('the Games'). The guarantee constitutes an international obligation of the United Kingdom.

In order to ensure that the UK can honour the guarantee, Ofcom may require the use of your radio equipment authorised by the enclosed licence to be coordinated with radio use supporting the organisation of the Games. Such requirement may arise during test events before the Games and/or during the Games themselves. As set out in Schedule 1 to the licence, Ofcom will give written notice of any such requirement, which may include you modifying or restricting use of your radio equipment or temporarily closing it down.

**PROGRAMME MAKING AND SPECIAL EVENTS
UK WIRELESS MICROPHONE LICENCE**

SCHEDULE 1 TO LICENCE NUMBER 7/0034483

DESCRIPTION OF RADIO EQUIPMENT COVERED BY THIS LICENCE

This schedule forms part of Licence **7/0034483**, issued to **SOUND CHOICE HIRE LTD (9648C)**, the Licensee, on **02 Nov 2011** and describes the Radio Equipment covered by the Licence and the purpose for which the Radio Equipment may be used.

1. (a) The Radio Equipment may only be used:

- (1) on such frequencies ("the Licensed Frequency"), shown in column 1 of Schedule 2 to the Licence in relation to the particular Radio Equipment ;
- (2) at a bandwidth not exceeding that specified in column 2 of Schedule 2 in relation to the Licensed Frequency;
- (3) at a power not exceeding that specified in column 3 of Schedule 2 in relation to the Licensed Frequency;
- (4) with the emission characteristics described in column 4 of Schedule 2 in relation to the Licensed Frequency;
- (5) in accordance with the restrictions contained in column 5 of Schedule 2 in relation to the Licensed Frequency and, where airborne operation is permitted, at a height above ground level not greater than specified in that column ;
- (6) with the signalling (if any) described in column 6 of Schedule 2 in relation to the Licensed Frequency;
- (7) at the location(s) or within the area(s) shown and in accordance with the restrictions contained in column 7 of Schedule 2 in relation to the Licensed Frequency .

- (b) The Radio Equipment may not be used** to transmit from any aircraft (for the avoidance of doubt, this includes any helicopter, model aircraft or helicopter, or any other airborne object, whether powered or not and whether captive or not), except where specified in column 5 of Schedule 2 in relation to the Licensed Frequency, and such power, subject to such restrictions noted .

2. Technical Performance Requirements

The Radio Equipment shall at all times be installed, maintained and used in such a way that it does not cause any undue interference with any authorised wireless telegraphy .

3. Purpose of Use

The Licensee shall use the Radio Equipment only:

- (a) for Programme Making; or
- (b) to enable those directly engaged in Programme Making to communicate with each other; or
- (c) to transmit the material produced in Programme Making to a receiving station of the Licensee; or to any receiving station owned and operated by a public telecommunications operator; or to a holder of a Programme Making and Special Events Licence issued under section 8 of the Wireless Telegraphy Act 2006; or to any other person approved by Ofcom ; or
- (d) to send or receive verbal or non-verbal test messages in connection with sub-clauses (a), (b) or (c) above.

4. Users of the Radio Equipment

The Licensee must ensure that the Radio Equipment is only used by persons who have been authorised in writing by the Licensee to do so and that such persons are made aware of, and comply with, the terms of this Licence, provided that

- (a) use of the Radio Equipment by such other persons is necessary for the purposes described in clause 3 above; and
- (b) such person is either –
 - (1) remain under the control or direction of the Licensee whilst operating the Radio Equipment,or –
 - (2) being customers of the Licensee who have occasionally hired the Radio Equipment, have been issued by the Licensee with a written permit which authorises use of the Radio Equipment subject to the terms, provisions and limitations in this Licence.

5. Call Sign

Use of the Radio Equipment must whenever practicable be preceded and terminated by the following call sign: 'CS9648'

6. Facilities

The use of the following methods of voice privacy are permitted without specific authorisation, provided that no undue interference is caused to other authorised radiousers:

- (i) frequency inversion;
- (ii) band inversion;
- (iii) band scrambling; and
- (iv) rolling code inversion.

7. Conformity Assessment Requirements

The Radio Equipment covered by this licence shall be subject to and comply with the appropriate Interface Requirement R2038 ("IR") or, for equipment placed on the market before 8 April 2000, is required to be type approved in accordance with the appropriate published technical performance standards authorised at the date of installation of the Radio Equipment, subject to any modifications authorised by Ofcom.

8. Interpretation

In this Licence:

- (a) the expression "Programme Making" includes the making of a programme for broadcast, the making of a film, presentation, advertisement or audio or videotape, and the staging or performance of an entertainment, sporting or other public event;
- (b) the expression "Wireless Microphone" includes Radio Equipment used for short range audio links intended for reception by a body-worn receiver;
- (c) the expression "occasionally hired" means a single period of use not exceeding 60 days and aggregate use during the period of this Licence not exceeding 90 days;
- (d) "IR" means the United Kingdom Radio Interface Requirement published by Ofcom in accordance with Article 4.1 of Directive 1999/5/EC of the European Parliament and of the Council on the radio equipment and telecommunication terminal equipment (RTTE) and mutual recognition of their conformity. The Directive (O.J.No.L91) was implemented in the UK by the Radio Equipment and Telecommunications Terminal Equipment Regulations (S.I.2000/730).

9. Modification, Restriction and Closedown relating to the London Olympic Games and Paralympic Games 2012

Ofcom may require the Radio Equipment to be modified or restricted in use, or temporarily closed down, either immediately or on the expiry of such period as may be specified, if the frequency(s) on which the Radio Equipment is authorised by this Licence to operate is required to support the organisation of the London Olympic Games and Paralympic Games 2012 including any test event(s) organised and handled by the London Organising Committee of the Olympic Games and Paralympic Games Limited ("the Games"). Ofcom may only exercise this power between date of issue or validity from date, whichever is earlier and 10 September 2012 in the event that the specified frequency(s) is required to support the organisation of the Games and after a written notice is served on the Licensee.

Issued by JFMGLimited on behalf of Ofcom.

WIRELESSTELEGRAPHY

GENERAL LICENCE CONDITIONS BOOKLET

Ofcom PMSE Version
8 February 2007

Introduction

Each Wireless Telegraphy licence, issued by the Office of Communications ("Ofcom")¹ under section 8 of the Wireless Telegraphy Act 2006 ("the Act"), authorises the licensee to establish and use stations or install or use apparatus for wireless telegraphy, subject to the terms, provisions and limitations of that licence.

The terms contained in this General Licence Conditions Booklet (the "Booklet") are incorporated into and form part of the terms, provisions and limitations of each wireless telegraphy licence to which this Booklet applies. (Each such wireless telegraphy licence is referred to as "the Licence").

General Licence Conditions

Condition 1 - Licence Term, Variation and Revocation

- 1.1 The Licences shall continue in force until the dates specified in the licence, unless earlier revoked by Ofcom or surrendered by the Licensee.
- 1.2 Pursuant to schedule 1 paragraph 8 of the Act Ofcom may not revoke this Licence under schedule 1 paragraph 6 except:
 - (a) at the request of, or with the consent of, the Licensee;
 - (b) if there has been a breach of any of the conditions of the Licence;
 - (c) in accordance with schedule 1 paragraph 8(5) of the Act;
 - (d) if it appears to Ofcom to be necessary or expedient to revoke the Licence for the purposes of complying with a direction by the Secretary of State given to Ofcom under section 5 of the Act; or
 - (e) for reasons related to the management of the radio spectrum.
- 1.3 Where Ofcom exercises their power to revoke or vary the Licence in accordance with schedule 1 paragraph 6 of the Act, the Licensee shall be notified in writing or by a general notice. Any general notices will be posted on the Ofcom website².

¹ "Ofcom" is the abbreviated name for the Office of Communications established by the Office of Communications Act 2002 to whom powers under the Act and previous Acts to issue and regulate licences have been transferred by the Communications Act 2003. The powers were conferred on 28th December 2003.

² www.ofcom.org.uk

Condition 2 - Changes

- 2.1 The Licence may not be transferred.
- 2.2 The Licensee must give immediate notice to Ofcom in writing of any change to the Licensee's name and address from that recorded on the Licence.

Condition 3 - Licence Fee

- 3.1 The Licensee shall pay to Ofcom the relevant sums as provided in section 12 of the Act and the regulations made thereunder:
 - i) on or before the date of issue of the Licence; and
 - ii) on or before the payment dates shown on the Licence for subsequent payments or such other dates as shall be notified in writing to the Licensee,in accordance with those regulations and any relevant terms, provisions and limitations of the Licence.

Condition 4 - Radio Equipment Use

- 4.1 The Licensee must ensure that the Radio Equipment relevant to each Licence is constructed, established, installed and used only in accordance with the provisions specified in the individual Licence schedules. Any proposal to amend any details specified in those schedules must be agreed with Ofcom in advance and implemented only after that Licence has been varied or reissued accordingly.
- 4.2 The Licensee must ensure that the Radio Equipment is used only by persons who have been authorised by the Licensee to do so, and that such persons are made aware of, and of their requirement to comply with, the terms of the Licence.

Condition 5 - Access and Inspection

- 5.1 The Licensee shall permit any person authorised by Ofcom:
 - i) to have access to the Radio Equipment; and
 - ii) to inspect the Licence and Radio Equipment,at any and all reasonable times or, when in the opinion of that person an urgent situation exists, at any time to ensure that the Radio Equipment is being used in accordance with the terms of the Licence.

Condition 6 - Modification, Restriction and Closedown

6.1 A person authorised by Ofcom may require the Radio Equipment, or any part thereof, to be modified or restricted in use, or temporarily or permanently closed down immediately if in the opinion of the person authorised by Ofcom:

- i) a breach of the Licence has occurred; and/or
- ii) the use of the Radio Equipment is causing or contributing to Undue Interference to the authorised use of other radio equipment.

6.2 Ofcom may require the Radio Equipment to be modified or restricted in use, or temporarily closed down either immediately or on the expiry of such period as may be specified in the event of a national or local state of emergency being declared. Ofcom may only exercise this power after a written notice is served on the Licensee or a general notice applicable to holders of a named class of Licence is published.

Condition 7 - Interpretation

7.1 In this Booklet and in the Licence:

- i) the establishment, installation and use of the Radio Equipment shall be interpreted as establishment and use of stations and installation and use of apparatus for wireless telegraphy as specified in section 8 of the Act;
- ii) "Undue Interference" shall have the meaning given by Section 115 of the Act; and
- iii) "inspect" includes examine and test.

7.2 In this Booklet "Radio Equipment" means the radio equipment specified in the Licence.

7.3 Any schedule to the Licence shall form part of the Licence together with any subsequent schedule which Ofcom may issue as a variation to the Licence.

7.4 The Interpretation Act 1978 shall apply to the Licence as it applies to an Act of Parliament.

Issued by Ofcom

HIRING OUT OR LOANING YOUR LICENSED WIRELESS MICROPHONES -

GUIDE TO THE USE OF THE "PERMIT TO USE" FORM

You may hire out or loan wireless microphones for limited periods on the frequencies stated on your current UK Wireless Microphone licence. The users will be covered under the terms and conditions of your current UK Wireless Microphone licence provided that written authority (a "Permit to Use") from you accompanies the wireless microphones.

This model form consists of two pages. Page 1 differs between VHF and UHF wireless microphone frequencies and you should ensure that the correct version is used (examine the top line of the title for "VHF" or "UHF").

You should complete the "Supplier's Details" section on page 1 with your address and licence details.

For each hiring or loan you should –

- (a) complete the "User's Details" and the "Operational Details" on page 1. You should keep a file copy of the completed page 1 and issue a copy of both pages to the user (we recommend that you copy page 2, Conditions of Use, onto the back of page 1 for the user); and
- (b) draw the user's attention to the Conditions of Use on page 2 and the operational restrictions under "Operational Details" on page 1.

Please contact us if you have any questions about licensing your wireless microphones.

JFMG
UK House, 4th Floor
2-5 Great Titchfield Street
London W1D 1NN

PERMIT TO USE UHF WIRELESS MICROPHONE LICENSED UNDER THE WIRELESS TELEGRAPHY ACT 2006

- The completed permit (pages 1 & 2) should be issued to the user whom must be able to produce it at all times.
- A copy of each issued permit should be kept by the supplier of the equipment (the licensee).

PERMIT TO USE WIRELESS MICROPHONES LICENSED UNDER THE WIRELESS TELEGRAPHY ACT 2006

The holder of a UK Wireless Microphone Licence may issue free permits to others to use hired or loaned equipment on the channels on that licence. The user is subject to the licence conditions, which are summarised below, and the operational restrictions , which are shown on page 1 of this permit.

SUMMARISED CONDITIONS OF USE -

1. The user shall ensure that the equipment is operated by authorised persons only and that they are aware of these conditions. Unauthorised persons, where possible, should be prevented from obtaining access to the equipment.
2. The equipment must only be operated on the frequencies shown on page 1 of this permit.
3. The equipment must only be operated at the exact locations shown on page 1 of this permit.
4. The equipment must not be operated at a power exceeding 10mW ERP for handheld equipment or 50mW ERP for body worn equipment.
(A body worn wireless microphone is a device which is intended to be worn next to or strapped closely to the user's body.)
5. The user shall permit any person authorised by the Office of Communications ("Ofcom") to have access to the equipment at any time when it is in use, and at any other reasonable time, for the purpose of its inspection and testing.
6. Use of the equipment shall be suspended forthwith at any time on the demand of a person acting under the authority of Ofcom, or restricted forthwith in the manner specified by such person.
7. Breach of these conditions may result in seizure of the equipment by a person acting under the authority of Ofcom.
8. All licence services are authorised on the condition that their use does not cause any undue interference to other authorised users. Ofcom reserves the right to terminate any licence or service that causes undue interference.
9. To qualify as a wireless microphone, equipment must comply with the appropriate Interface Requirement IR2038 (published by Ofcom) or, for equipment placed on the market before 8 April 2000, must conform to the standards MPT1350 (UK) or ETS300422 (ETSI).
10. These frequencies are licensed only for the transmission of programme material and not for data transmission.
